

Ching Shih

Chinese pirate queen

Ching Shih was a Chinese pirate queen who commanded a fleet of hundreds of ships and tens of thousands of pirates during the early 19th century. She was known for her strategic thinking, leadership skills, and ability to negotiate with both Chinese and European authorities. Under her leadership, her fleet became so powerful that the Chinese government was forced to offer her amnesty and allow her to retire with her wealth. Ching Shih's legacy as a successful pirate leader has made her a symbol of strength and independence in Chinese culture.

Work

Senior Software Engineer

Tech Innovators · A tech startup that develops innovative software solutions for businesses.

Jan 2018 – Invalid Date

San Francisco, CA

Lead the development of a large-scale microservices architecture using Java and MySQL, with a focus on service-oriented development and cloud-based systems.

- Designed and implemented a scalable and highly available service that met customer SLAs across the globe.
- Collaborated with cross-functional teams to deliver value through a collaborative approach spanning many teams across geographies.
- Mentored and developed engineers across all levels through sharing and learning.

Software Development Engineer

GlobalTech · A global technology company that provides software solutions to businesses worldwide.

Jun 2016 – Dec 2017

New York, NY

Developed and maintained large-scale backend systems using Java and C++, with a focus on delivering high-quality, highly available services.

- Collaborated with cross-functional teams to drive long-term design thinking for systems and engineering processes with simplicity and maintainability as core tenets.
- Demonstrated proficiency in coding and experience with architectural patterns of large, high-scale applications.
- Took initiative to adapt to acquire new knowledge and skills, effectively solve complex problems, and support and resolve customer problems.

Backend Software Engineer

Backend Software Engineer

Innovative Solutions · A software development company that specializes in building high-quality, scalable software solutions for businesses.

Jul 2014 – May 2016

Seattle, WA

Developed and maintained large-scale backend systems using C# and Java, with a focus on building web services that covered all stages of the release cycle.

- Demonstrated technical, cross-group collaboration and communication skills.
- Built and maintained a highly available service that met customer SLAs across the globe.
- Demonstrated debugging and troubleshooting skills, with an enthusiastic attitude to support and resolve customer problems.

Lead Software Engineer

Tech Solutions Inc. · A technology solutions provider that specializes in building software solutions for businesses.

Aug 2012 – Jun 2014

Austin, TX

Led the development of a large-scale microservices architecture using Java and MySQL, with a focus on service-oriented development and cloud-based systems.

- Delivered a high-quality, highly available service that met customer SLAs across the globe.
- Demonstrated proficiency in coding and experience with architectural patterns of large, high-scale applications.
- Collaborated with cross-functional teams to drive long-term design thinking for systems and engineering processes with simplicity and maintainability as core tenets.

Senior Backend Engineer

Software Innovations · A software development company that specializes in building high-quality, scalable software solutions for businesses.

May 2010 – Jul 2012

Chicago, IL

Developed and maintained large-scale backend systems using Java and C++, with a focus on delivering high-quality, highly available services.

- Demonstrated proficiency in coding and experience with architectural patterns of large, high-scale applications.
- Built and maintained a highly available service that met customer SLAs across the globe.
- Demonstrated debugging and troubleshooting skills, with an enthusiastic attitude to support and resolve customer problems.

Volunteer

Teacher

CoderDojo

Jan 2012 – Jan 2013

Global movement of free coding clubs for young people.

- Awarded 'Teacher of the Month'

Education

Stanford University

Computer Science

Sep 2006 – Jun 2010

Bachelor's Degree

Courses

- Data Structures and Algorithms

- Data Structures and Algorithms

- Operating Systems
- Computer Networks

Massachusetts Institute of Technology

Computer Science and Engineering

Sep 2010 – Jun 2012

Master's Degree

Courses

- Distributed Systems
- Advanced Algorithms
- Database Systems

Awards

Excellence in Teaching Award

Awarded by National Education Association

May 2022

This award recognizes exceptional teaching and dedication to the profession. The recipient has demonstrated a commitment to student learning and has made significant contributions to the field of education through their innovative teaching methods and curriculum development.

Lifetime Achievement Award

Awarded by International Association of Scientists

Jan 2023

This award recognizes a lifetime of outstanding contributions to the field of science. The recipient has made significant advancements in their field and has been a leader in research and innovation. Their work has had a significant impact on the scientific community and society as a whole.
