Gertrude Bell
Nation Builder

Gertrude Bell was an English writer, traveler, and archaeologist who played a key role in the establishment of modern Iraq. She was known for her extensive knowledge of the Arab world, her fluency in several languages, and her diplomatic skills. Bell worked closely with the British government during World War I and was instrumental in the creation of the modern state of Iraq. She helped to draft the country's first constitution, established the National Museum of Iraq, and played a key role in the selection of its first king. Bell was also a prolific writer and photographer, documenting her travels and experiences in the Middle East. Her legacy as a trailblazing diplomat and cultural expert has inspired generations of scholars and diplomats and has helped to shape the modern Middle East.

Work

Senior Software Engineer

Acme Software Solutions · Acme Software Solutions is a leading software development company that specializes in creating innovative solutions for businesses of all sizes.
Jan 2016 – Dec 2019
San Francisco, CA

Led the development of a large-scale microservice architecture using Java and mySQL, covering all stages of the release cycle.

- Designed and implemented a highly available service that met customer SLAs across the globe.
- Collaborated with teams across geographies to deliver value through a collaborative approach.
- Mentored and developed engineers across all levels through sharing and learning.
- Demonstrated proficiency in coding and experience with architectural patterns of large, high-scale applications.
- Debugged and troubleshot complex problems, with an enthusiastic attitude to support and resolve customer problems.

Software Engineer

Innovative Software Solutions · Innovative Software Solutions is a software development company that specializes in creating cutting-edge solutions for businesses.
Jun 2017 – May 2019
New York, NY

Contributed to the development of a large-scale microservice architecture using Java and mySQL.

- Collaborated with teams across geographies to deliver value through a collaborative approach.
- Demonstrated proficiency in coding and experience with architectural patterns of large, high-scale applications.
- Debugged and troubleshot complex problems, with an enthusiastic attitude to support and resolve customer problems.
- Demonstrated technical, cross-group collaboration and communication skills.
- Took initiative to acquire new knowledge and skills, effectively solving complex problems.

Senior Java Developer

Global Software Solutions · Global Software Solutions is a leading software development company that specializes in creating innovative solutions for businesses worldwide.
Mar 2015 – Feb 2018
London, UK

Designed and implemented a large-scale microservice architecture using Java and mySQL, covering all stages of the release cycle.

- Delivered a high-quality, highly available service that met customer SLAs across the globe.
- Demonstrated proficiency in coding and experience with architectural patterns of large, high-scale applications.
- Collaborated with teams across geographies to deliver value through a collaborative approach.
- Mentored and developed engineers across all levels through sharing and learning.
- Demonstrated technical, cross-group collaboration and communication skills.

Software Developer

Innovative Tech Solutions · Innovative Tech Solutions is a technology company that specializes in creating innovative solutions for businesses of all sizes.
Aug 2016 – Jul 2018
Seattle, WA

Contributed to the development of a large-scale microservice architecture using Java and mySQL.

- Demonstrated proficiency in coding and experience with architectural patterns of large, high-scale applications.
- Debugged and troubleshot complex problems, with an enthusiastic attitude to support and resolve customer problems.
- Demonstrated technical, cross-group collaboration and communication skills.
- Took initiative to acquire new knowledge and skills, effectively solving complex problems.
- Experience building web services using Java and mySQL, covering all stages of the release cycle.

Java Developer

Innovative Solutions Group · Innovative Solutions Group is a technology company that specializes in creating innovative solutions for businesses of all sizes.
May 2017 – Apr 2019
Chicago, IL

Contributed to the development of a large-scale microservice architecture using Java and mySQL.

- Demonstrated proficiency in coding and experience with architectural patterns of large, high-scale applications.
- Experience building web services using Java and mySQL, covering all stages of

the release cycle.

- Demonstrated technical, cross-group collaboration and communication skills.
- Took initiative to acquire new knowledge and skills, effectively solving complex problems.
- Demonstrated debugging and troubleshooting skills, with an enthusiastic attitude to support and resolve customer problems.

Volunteer

Teacher

CoderDojo

Jan 2012 – Jan 2013

Global movement of free coding clubs for young people.

- Awarded 'Teacher of the Month'

Education

Carnegie Mellon University

Computer Science

Aug 2013 – May 2017

Bachelor's Degree

Courses

- Introduction to Computer Systems
- Principles of Software Construction
- Database Systems

Awards

Excellence in Leadership Award

Awarded by **ABC Corporation**

May 2019

Recognized for exceptional leadership skills and ability to inspire and motivate team members.

Innovation Award

Awarded by **XYZ Corporation**

Sep 2017

Recognized for innovative thinking and ability to develop creative solutions to complex problems.
